Dismantling	September 12, 2027	pred. 18:00–22:00 h
	September 13–15, 2027	daily 06:00–22:00 h

Special features of the location

The equestrian monument in the center of the location must remain clearly visible and freely accessible during the entire duration of the IAA MOBILITY.

The Bavarian State Ministry of the Interior, Sport and Integration is located on the eastern side of the square. A security area extends along the entire edge of the building, 15 meters into the square. This area cannot be driven on and must be always kept clear of any material.

Power supply

Max. 400 W are available per m² of stand space.

The cable routing is planned individually and is always via the corridor. The overall planning will be carried out after an overall space check and depending on the overall requirements of all exhibitors.

It may be necessary to route cables through other areas to supply individual stand areas.

Water supply

Water and waste water connections are available.

The discharge points are determined individually by the Site Manager; pipes are always routed via the corridor. The final planning is carried out after an overall site inspection.

It may be necessary to route pipes through other areas to supply individual stand areas.

Floor load

The permissible point load on a base area of 50 cm by 50 cm (distance approx. 1.50 m) is 5 t (50 kN, soil pressure 200 kN/m²).

Floor protection

An individual soil protection concept must be developed in consultation with the site manager (OMS) to protect the historic existing soil. If structural protection measures are required, they will be implemented exclusively by Messe München GmbH. The costs will be invoiced to exhibitors in accordance with the area in question.

Important information — Wittelsbacherplatz

Construction height

Maximum construction and advertising height: approx. 6.00 m
Deviating construction heights will be checked individually

Logistics

No space is available outside the rented stand area for temporary storage or any other use.

Tools and materials may only be stored within the rented booth space. This must be taken into account when planning the booth design.

Loading and unloading takes place exclusively within the rented areas.

To manage the overall logistics at Wittelsbacherplatz, the organizer will assign a logistics supervisor. The costs will be charged to the exhibitors on a pro rata basis.

The following apply to all spaces
